

99Sounds proudly presents **Space Divers Mini**, the freely downloadable add-on Lukas Tvrdon's brand new Space Divers sound library. Space Divers Mini contains 49 original sound effects which aren't available in the main release.

The library is inspired by space and underwater exploration, sci-fi movies, and Lukas' own work on audio effects for video games. You can use these sound effects in movies and other video projects, but they will also work great for music producers who want to add a taste of sci-fi to their projects.

Contents

49 sound effects

24-bit WAV format

455 MB download size

817 MB size on disk

RAR archive

LICENSE

The included samples were crafted by Lukas Tvrdon and are royalty-free for use in your music, video game development, videos and other creative projects, both free and commercial. You are not allowed to redistribute these samples (as in share or sell them on other websites), nor use them as the sound source in audio related software and/or sound libraries, free or commercial.
